

Screening Stations

There will be a screening station in place at the client entrance of the clinic. All people with the intention of coming inside MPTC (including staff, patients, and accompanying adults) will be screened upon entering. Each screening will be recorded on log by a staff member.

Screening Criteria

To pass a screening, a person must not have any symptoms or environmental factors related to COVID-19.

Each person's temperature will be taken using a touchless thermometer at the door.

People will be asked if they've traveled to countries known to have wide spread cases of COVID-19 or have been exposed to/in direct contact with someone with COVID-19.

If the person is currently or within the last 14 days experienced the following quantities of symptoms.

One or more:	Two or more:
1. Cough 2. Shortness of breath / difficulty breathing 3. Temperature 99.5F+	A. Chills B. Repeated Shaking with chills C. Muscle Pain D. Headache E. Sore Throat F. New loss of taste or smell

If a person does not pass their screening, they will not be able to enter the clinic. It is advised they contact their primary care physician for further directions
